

Gradient Investments, LLC: Structured Note Addendum to Investment Proposal & Contract

Portfolio:	Dual Directional Buffered	CUSIP:		06746CKZ1	
Description:	Buffered Dual Direc. Note	Underwriter:		Barclays	
Index (Indices):	S&P 500 Index				
Type of Protection:	Buffer	Level of Protection:		20%	
Callable Offering:	No	Cap:	19.25%	Participation Rate:	100%
Call Feature:	N/A	Maturity Length:		24 mos	
Coupon Rate and Frequency:	N/A	Coupon Barrier:		N/A	
Funding Deadline Date:	8/12/2025	Execution Date:		8/15/2025	
Valuation Date:	8/16/2027	Settlement Date:		8/19/2027	

1. The final cap rate or coupon rate will be determined on the execution date and will be disclosed on the final prospectus. Final rates will be at or above the stated levels and dependent on market conditions during the offering period.
2. Liquidations prior to maturity are completed at the current net asset value (NAV) and are subject to a custodial liquidation charge. This charge is currently \$1 per unit with a minimum of \$10 and a maximum of \$250.
3. Structured notes intra-period pricing may not correlate with the price return of the index.
4. Structured notes are subject to the credit risk of the underwriter.
5. Structured notes that use lesser performing return for multiple indices dictates that performance of the offering will be based on the index that provides the lesser of return during the pre-determined timeframe.
6. Structured notes that use dual directional structures dictate that if index performance is negative, but not below the buffer level, the return will be the absolute value (or inverse) of the index return.
7. Structured notes may use barrier or buffered levels of protection. If the value of the index is below the threshold at the observation date, the investor may participate in loss. With a buffer, the investor participates in loss 1 for 1 after the buffered level of protection. With a barrier, the investor participates in the FULL decline of the index if below the barrier level.
8. Structured notes that pay coupons may be subject to coupon barriers. If the index value is at or above the stated threshold, the coupon payment is made. If the index value is below the stated threshold, the coupon is forfeited.
9. Structured notes may be subject to a call provision. Auto callable notes are subject to mandatory call if pre-determined criteria are met. Issuer callable notes can be called at issuer discretion. Notes with call features are only callable on observation dates listed in the prospectus. If called, the position expires, and full principal is returned.
10. If demand for the offering size is not met, the offering is subject to cancellation.
11. Investments in structured products must be limited to 45% of a client's liquid net worth.
12. Structured notes that use 100% principal protection will be treated as ordinary income. Investors may be required to pay a portion of tax before maturity, even if they have not received any cash payments.

☐ Check box if client is currently invested in a matured/called structured note and using proceeds in the current offering.

			<input type="checkbox"/> Full	<input type="checkbox"/> Partial \$

By signing below, the client acknowledges receipt of this structured note pre-pricing document. In addition, client acknowledges the investment outcome terms and risks involved with structured notes as spelled out in the pricing documents.

The client also acknowledges that their investment in structured notes, in aggregate, is no more than 45% of their Liquid Net Worth. Liquid Net Worth is defined as net worth minus assets that cannot be quickly and easily converted into cash, including but not limited to, real estate, business equity, personal property, automobiles, expected inheritances, assets earmarked for other purposes, and investments or accounts subject to substantial penalties, fees or charges due to early sale or withdrawal.

\$●
Buffered Dual Directional Notes due August 19, 2027
Linked to the S&P 500® Index
Global Medium-Term Notes, Series A

Unlike ordinary debt securities, the Notes do not pay interest and do not guarantee the return of the full principal amount at maturity. Instead, as described below, the Notes offer unleveraged exposure to potential appreciation of the Underlier from the Initial Underlier Value to the Final Underlier Value, subject to the Maximum Upside Return, and an unleveraged positive return based on any potential depreciation of the Underlier from the Initial Underlier Value to the Final Underlier Value, but only if the Final Underlier Value is greater than or equal to the Buffer Value. Investors should be willing to forgo dividend payments and, if the Final Underlier Value is less than the Buffer Value, be willing to lose up to 80.00% of their investment at maturity.

KEY TERMS*

Issuer:	Barclays Bank PLC		
Denominations:	Minimum denomination of \$1,000, and integral multiples of \$1,000 in excess thereof		
Initial Valuation Date: [†]	August 15, 2025	Final Valuation Date: [†]	August 16, 2027
Issue Date:	August 20, 2025	Maturity Date: [†]	August 19, 2027
Reference Asset:	The S&P 500® Index (Bloomberg ticker symbol “SPX<Index>”) (the “Underlier”)		
Payment at Maturity:	You will receive on the Maturity Date a cash payment per \$1,000 principal amount Note determined as follows:		
	<ul style="list-style-type: none"> If the Final Underlier Value is <i>greater than</i> the Initial Underlier Value, you will receive a payment per \$1,000 principal amount Note calculated as follows: $\\$1,000 + (\\$1,000 \times \text{lesser of (a) Underlier Return and (b) Maximum Upside Return})$ If the Final Underlier Value is <i>less than or equal to</i> the Initial Underlier Value but <i>greater than or equal to</i> the Buffer Value, you will receive a payment per \$1,000 principal amount Note calculated as follows: $\\$1,000 + (\\$1,000 \times \text{Absolute Value Return})$ 		
	<p><i>If the Final Underlier Value is less than or equal to the Initial Underlier Value but greater than or equal to the Buffer Value, you will receive a positive 1% return on the Notes for each 1% decrease of the Underlier. In no event will this return exceed 20.00%.</i></p> <ul style="list-style-type: none"> If the Final Underlier Value is <i>less than</i> the Buffer Value, you will receive an amount per \$1,000 principal amount Note calculated as follows: $\\$1,000 + [\\$1,000 \times (\text{Underlier Return} + \text{Buffer Percentage})]$ 		
	<p><i>If the Final Underlier Value is less than the Buffer Value, your Notes will be exposed to the decline of the Underlier in excess of the Buffer Percentage from the Initial Underlier Value and you will lose up to 80.00% of your investment at maturity. Any payment on the Notes, including any repayment of principal, is not guaranteed by any third party and is subject to (a) the creditworthiness of Barclays Bank PLC and (b) the risk of exercise of any U.K. Bail-in Power (as described on page PS-4 of this pricing supplement) by the relevant U.K. resolution authority. See “Selected Risk Considerations” and “Consent to U.K. Bail-in Power” in this pricing supplement and “Risk Factors” in the accompanying prospectus supplement.</i></p>		
Consent to U.K. Bail-in Power:	Notwithstanding and to the exclusion of any other term of the Notes or any other agreements, arrangements or understandings between Barclays Bank PLC and any holder or beneficial owner of the Notes (or the trustee on behalf of the holders of the Notes), by acquiring the Notes, each holder or beneficial owner of the Notes acknowledges, accepts, agrees to be bound by, and consents to the exercise of, any U.K. Bail-in Power by the relevant U.K. resolution authority. See “Consent to U.K. Bail-in Power” on page PS-4 of this pricing supplement.		
Maximum Upside Return:	19.25%. Accordingly, if the Underlier Return is greater than or equal to 19.25%, you will receive the Maximum Upside Return of 19.25%, which entitles you to the maximum payment at maturity if the Underlier appreciates of \$1,192.50 per \$1,000 principal amount Note.		
Buffer Percentage:	20.00%		
Underlier Return:	$\frac{\text{Final Underlier Value} - \text{Initial Underlier Value}}{\text{Initial Underlier Value}}$		
Absolute Value Return:	The absolute value of the Underlier Return. For example, a -5% Underlier Return will result in a +5% Absolute Value Return.		
Buffer Value:	, which is 80.00% of the Initial Underlier Value (rounded to two decimal places)		
Initial Underlier Value:	, which is the Closing Value of the Underlier on the Initial Valuation Date		

(Terms of the Notes continue on the next page)

	<u>Initial Issue Price⁽¹⁾⁽²⁾</u>	<u>Price to Public</u>	<u>Agent’s Commission⁽³⁾</u>	<u>Proceeds to Barclays Bank PLC</u>
Per Note	\$1,000	100%	0.15%	99.85%
Total	\$●	\$●	\$●	\$●

- Because dealers who purchase the Notes for sale to certain fee-based advisory accounts may forgo some or all selling concessions, fees or commissions, the public offering price for investors purchasing the Notes in such fee-based advisory accounts may be between \$998.50 and \$1,000 per \$1,000 principal amount Note. Investors that hold their Notes in fee-based advisory or trust accounts may be charged fees by the investment advisor or manager of such account based on the amount of assets held in those accounts, including the Notes.
- Our estimated value of the Notes on the Initial Valuation Date, based on our internal pricing models, is expected to be between \$942.60 and \$992.60 per \$1,000 principal amount Note. The estimated value is expected to be less than the initial issue price of the Notes. See “Additional Information Regarding Our Estimated Value of the Notes” on page PS-5 of this pricing supplement.
- Barclays Capital Inc. will receive commissions from the Issuer of up to \$1.50 per \$1,000 principal amount Note. Barclays Capital Inc. will use these commissions to pay variable selling concessions or fees (including custodial or clearing fees) to other dealers. The actual commission received by Barclays Capital Inc. will be equal to the selling concession paid to such dealers.

Investing in the Notes involves a number of risks. See “Risk Factors” beginning on page S-9 of the prospectus supplement and “Selected Risk Considerations” beginning on page PS-9 of this pricing supplement.

The Notes will not be listed on any U.S. securities exchange or quotation system. Neither the U.S. Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of these Notes or determined that this pricing supplement is truthful or complete. Any representation to the contrary is a criminal offense.

The Notes constitute our unsecured and unsubordinated obligations. The Notes are not deposit liabilities of Barclays Bank PLC and are not covered by the U.K. Financial Services Compensation Scheme or insured by the U.S. Federal Deposit Insurance Corporation or any other governmental agency or deposit insurance agency of the United States, the United Kingdom or any other jurisdiction.

(Terms of the Notes continued from previous page)

Final Underlier Value:	The Closing Value of the Underlier on the Final Valuation Date
Closing Value:	Closing Value has the meaning assigned to “closing level” set forth under “Reference Assets—Indices—Special Calculation Provisions” in the prospectus supplement.
Calculation Agent:	Barclays Bank PLC
Additional Terms:	Terms used in this pricing supplement, but not defined herein, shall have the meanings ascribed to them in the prospectus supplement.
CUSIP / ISIN:	06746CKZ1 / US06746CKZ13

* The Underlier and the terms of the Notes are subject to adjustment by the Calculation Agent and the Maturity Date may be accelerated, in each case under certain circumstances as set forth in the accompanying prospectus supplement. See “Selected Risk Considerations—Risks Relating to the Underlier” below.

† Subject to postponement in certain circumstances, as described under “Reference Assets—Indices—Market Disruption Events for Securities with an Equity Index as a Reference Asset” and “Terms of the Notes—Payment Dates” in the accompanying prospectus supplement

ADDITIONAL DOCUMENTS RELATED TO THE OFFERING OF THE NOTES

You should read this pricing supplement together with the prospectus dated May 15, 2025, as supplemented by the prospectus supplement dated May 15, 2025 relating to our Global Medium-Term Notes, Series A, of which these Notes are a part, and the underlying supplement dated May 15, 2025. This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth under “Risk Factors” in the prospectus supplement and “Selected Risk Considerations” in this pricing supplement, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Prospectus dated May 15, 2025:
<http://www.sec.gov/Archives/edgar/data/312070/000119312525120720/d925982d424b2.htm>
- Prospectus Supplement dated May 15, 2025:
http://www.sec.gov/Archives/edgar/data/312070/000095010325006051/dp228678_424b2-prosupp.htm
- Underlying Supplement dated May 15, 2025:
http://www.sec.gov/Archives/edgar/data/312070/000095010325006053/dp228705_424b2-underl.htm

Our SEC file number is 1-10257. As used in this pricing supplement, “we,” “us” and “our” refer to Barclays Bank PLC.

CONSENT TO U.K. BAIL-IN POWER

Notwithstanding and to the exclusion of any other term of the Notes or any other agreements, arrangements or understandings between us and any holder or beneficial owner of the Notes (or the trustee on behalf of the holders of the Notes), by acquiring the Notes, each holder or beneficial owner of the Notes acknowledges, accepts, agrees to be bound by, and consents to the exercise of, any U.K. Bail-in Power by the relevant U.K. resolution authority.

Under the U.K. Banking Act 2009, as amended, the relevant U.K. resolution authority may exercise a U.K. Bail-in Power in circumstances in which the relevant U.K. resolution authority is satisfied that the resolution conditions are met. These conditions include that a U.K. bank or investment firm is failing or is likely to fail to satisfy the Financial Services and Markets Act 2000 (the “FSMA”) threshold conditions for authorization to carry on certain regulated activities (within the meaning of section 55B FSMA) or, in the case of a U.K. banking group company that is a European Economic Area (“EEA”) or third country institution or investment firm, that the relevant EEA or third country relevant authority is satisfied that the resolution conditions are met in respect of that entity.

The U.K. Bail-in Power includes any write-down, conversion, transfer, modification and/or suspension power, which allows for (i) the reduction or cancellation of all, or a portion, of the principal amount of, or interest on, or any other amounts payable on, the Notes; (ii) the conversion of all, or a portion, of the principal amount of, or interest on, or any other amounts payable on, the Notes into shares or other securities or other obligations of Barclays Bank PLC or another person (and the issue to, or conferral on, the holder or beneficial owner of the Notes of such shares, securities or obligations); (iii) the cancellation of the Notes and/or (iv) the amendment or alteration of the maturity of the Notes, or the amendment of the amount of interest or any other amounts due on the Notes, or the dates on which interest or any other amounts become payable, including by suspending payment for a temporary period; which U.K. Bail-in Power may be exercised by means of a variation of the terms of the Notes solely to give effect to the exercise by the relevant U.K. resolution authority of such U.K. Bail-in Power. Each holder and beneficial owner of the Notes further acknowledges and agrees that the rights of the holders or beneficial owners of the Notes are subject to, and will be varied, if necessary, solely to give effect to, the exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority. For the avoidance of doubt, this consent and acknowledgment is not a waiver of any rights holders or beneficial owners of the Notes may have at law if and to the extent that any U.K. Bail-in Power is exercised by the relevant U.K. resolution authority in breach of laws applicable in England.

For more information, please see “Selected Risk Considerations—Risks Relating to the Issuer—You May Lose Some or All of Your Investment If Any U.K. Bail-in Power Is Exercised by the Relevant U.K. Resolution Authority” in this pricing supplement as well as “U.K. Bail-in Power,” “Risk Factors—Risks Relating to the Securities Generally—Regulatory action in the event a bank or investment firm in the Group is failing or likely to fail, including the exercise by the relevant U.K. resolution authority of a variety of statutory resolution powers, could materially adversely affect the value of any securities” and “Risk Factors—Risks Relating to the Securities Generally—Under the terms of the securities, you have agreed to be bound by the exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority” in the accompanying prospectus supplement.

ADDITIONAL INFORMATION REGARDING OUR ESTIMATED VALUE OF THE NOTES

The final terms for the Notes will be determined on the date the Notes are initially priced for sale to the public, which we refer to as the Initial Valuation Date, based on prevailing market conditions on or prior to the Initial Valuation Date, and will be communicated to investors either orally or in a final pricing supplement.

Our internal pricing models take into account a number of variables and are based on a number of subjective assumptions, which may or may not materialize, typically including volatility, interest rates and our internal funding rates. Our internal funding rates (which are our internally published borrowing rates based on variables such as market benchmarks, our appetite for borrowing, and our existing obligations coming to maturity) may vary from the levels at which our benchmark debt securities trade in the secondary market. Our estimated value on the Initial Valuation Date is based on our internal funding rates. Our estimated value of the Notes might be lower if such valuation were based on the levels at which our benchmark debt securities trade in the secondary market.

Our estimated value of the Notes on the Initial Valuation Date is expected to be less than the initial issue price of the Notes. The difference between the initial issue price of the Notes and our estimated value of the Notes is expected to result from several factors, including any sales commissions expected to be paid to Barclays Capital Inc. or another affiliate of ours, any selling concessions, discounts, commissions or fees expected to be allowed or paid to non-affiliated intermediaries, the estimated profit that we or any of our affiliates expect to earn in connection with structuring the Notes, the estimated cost that we may incur in hedging our obligations under the Notes, and estimated development and other costs that we may incur in connection with the Notes.

Our estimated value on the Initial Valuation Date is not a prediction of the price at which the Notes may trade in the secondary market, nor will it be the price at which Barclays Capital Inc. may buy or sell the Notes in the secondary market. Subject to normal market and funding conditions, Barclays Capital Inc. or another affiliate of ours intends to offer to purchase the Notes in the secondary market but it is not obligated to do so.

Assuming that all relevant factors remain constant after the Initial Valuation Date, the price at which Barclays Capital Inc. may initially buy or sell the Notes in the secondary market, if any, and the value that we may initially use for customer account statements, if we provide any customer account statements at all, may exceed our estimated value on the Initial Valuation Date for a temporary period expected to be approximately six months after the Issue Date because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the Notes and other costs in connection with the Notes that we will no longer expect to incur over the term of the Notes. We made such discretionary election and determined this temporary reimbursement period on the basis of a number of factors, which may include the tenor of the Notes and/or any agreement we may have with the distributors of the Notes. The amount of our estimated costs that we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the initial Issue Date of the Notes based on changes in market conditions and other factors that cannot be predicted.

We urge you to read the “Selected Risk Considerations” beginning on page PS-9 of this pricing supplement.

You may revoke your offer to purchase the Notes at any time prior to the Initial Valuation Date. We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to the Initial Valuation Date. In the event of any changes to the terms of the Notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

SELECTED PURCHASE CONSIDERATIONS

The Notes are not appropriate for all investors. The Notes may be an appropriate investment for you if all of the following statements are true:

- You do not seek an investment that produces periodic interest or coupon payments or other sources of current income.
- You understand and accept that you may not participate in the full appreciation of the Underlier, which may be significant, and that your potential return on the Notes if the Underlier appreciates is limited to the Maximum Upside Return.
- You understand that the Absolute Value Return feature applies only if the Underlier decreases from the Initial Underlier Value but not by more than 20.00%, that any positive return in the event that the Final Underlier Value is less than the Initial Underlier Value is limited to 20.00% and that any decline in the Final Underlier Value from the Initial Underlier Value by more than 20.00% will result in a loss, rather than a positive return, on the Notes.
- You can tolerate a loss of up to 80.00% of your principal amount, and you are willing and able to make an investment that may have downside market risk similar to that of an investment in the Underlier.
- You do not anticipate that the Final Underlier Value will fall below the Buffer Value.
- You understand and are willing and able to accept the risks associated with an investment linked to the performance of the Underlier.
- You understand and accept that you will not be entitled to receive dividends or distributions that may be paid to holders of the securities composing the Underlier, nor will you have any voting rights with respect to the securities composing the Underlier.
- You can tolerate fluctuations in the price of the Notes that may be similar to or exceed the downside fluctuations in the value of the Underlier.
- You do not seek an investment for which there will be an active secondary market, and you are willing and able to hold the Notes to maturity.
- You are willing and able to assume our credit risk for all payments on the Notes.
- You are willing and able to consent to the exercise of any U.K. Bail-in Power by any relevant U.K. resolution authority.

The Notes may not be an appropriate investment for you if *any* of the following statements are true:

- You seek an investment that produces periodic interest or coupon payments or other sources of current income.
- You seek an investment that participates in the full appreciation of the Underlier rather than an investment with a return if the Underlier appreciates that is limited to the Maximum Upside Return.
- You are unwilling or unable to accept that the Absolute Value Return feature applies only if the Underlier decreases from the Initial Underlier Value but not by more than 20.00%, that any positive return in the event that the Final Underlier Value is less than the Initial Underlier Value is limited to 20.00% or that any decline in the Final Underlier Value from the Initial Underlier Value by more than 20.00% will result in a loss, rather than a positive return, on the Notes.
- You seek an investment that provides for the full repayment of principal at maturity, and/or you are unwilling or unable to accept the risk that you may lose up to 80.00% of the principal amount of your Notes in the event that the Final Underlier Value falls below the Buffer Value.
- You anticipate that the Final Underlier Value will fall below the Buffer Value.
- You do not understand and/or are unwilling or unable to accept the risks associated with an investment linked to the performance of the Underlier.
- You seek an investment that entitles you to dividends or distributions on, or voting rights related to, the securities composing the Underlier.
- You cannot tolerate fluctuations in the price of the Notes that may be similar to or exceed the downside fluctuations in the value of the Underlier.
- You seek an investment for which there will be an active secondary market, and/or you are unwilling or unable to hold the Notes to maturity.
- You prefer the lower risk, and therefore accept the potentially lower returns, of fixed income investments with comparable maturities and credit ratings.
- You are unwilling or unable to assume our credit risk for all payments on the Notes.
- You are unwilling or unable to consent to the exercise of any U.K. Bail-in Power by any relevant U.K. resolution authority.

You must rely on your own evaluation of the merits of an investment in the Notes. You should reach a decision whether to invest in the Notes after carefully considering, with your advisors, the appropriateness of the Notes in light of your investment objectives and the specific information set out in this pricing supplement, the prospectus, the prospectus supplement and the underlying supplement. Neither the Issuer nor Barclays Capital Inc. makes any recommendation as to the appropriateness of the Notes for investment.

HYPOTHETICAL EXAMPLES OF AMOUNTS PAYABLE AT MATURITY

The following table illustrates the hypothetical payment at maturity under various circumstances. The examples set forth below are purely hypothetical and are provided for illustrative purposes only. The numbers appearing in the following table and examples have been rounded for ease of analysis. The hypothetical examples below do not take into account any tax consequences from investing in the Notes and make the following key assumptions:

- *Hypothetical* Initial Underlier Value: 100.00*
- *Hypothetical* Buffer Value: 80.00 (80.00% of the hypothetical Initial Underlier Value set forth above)*

* The **hypothetical** Initial Underlier Value of 100.00 and the **hypothetical** Buffer Value of 80.00 have been chosen for illustrative purposes only and may not represent a likely actual Initial Underlier Value or Buffer Value. The actual Initial Underlier Value will be equal to the Closing Value of the Underlier on the Initial Valuation Date, and the actual Buffer Value will be equal to 80.00% of the Initial Underlier Value.

For information regarding recent values of the Underlier, please see “Information Regarding the Underlier” in this pricing supplement.

Final Underlier Value	Underlier Return	Absolute Value Return	Payment at Maturity per \$1,000 Principal Amount Note
200.00	100.00%	N/A	\$1,192.50
190.00	90.00%	N/A	\$1,192.50
180.00	80.00%	N/A	\$1,192.50
170.00	70.00%	N/A	\$1,192.50
160.00	60.00%	N/A	\$1,192.50
150.00	50.00%	N/A	\$1,192.50
140.00	40.00%	N/A	\$1,192.50
130.00	30.00%	N/A	\$1,192.50
120.00	20.00%	N/A	\$1,192.50
119.25	19.25%	N/A	\$1,192.50
110.00	10.00%	N/A	\$1,100.00
105.00	5.00%	N/A	\$1,050.00
102.50	2.50%	N/A	\$1,025.00
100.00	0.00%	0.00%	\$1,000.00
95.00	-5.00%	5.00%	\$1,050.00
90.00	-10.00%	10.00%	\$1,100.00
80.00	-20.00%	20.00%	\$1,200.00
79.99	-20.01%	N/A	\$999.90
70.00	-30.00%	N/A	\$900.00
60.00	-40.00%	N/A	\$800.00
50.00	-50.00%	N/A	\$700.00
40.00	-60.00%	N/A	\$600.00
30.00	-70.00%	N/A	\$500.00
20.00	-80.00%	N/A	\$400.00
10.00	-90.00%	N/A	\$300.00
0.00	-100.00%	N/A	\$200.00

The following examples illustrate how the payments at maturity set forth in the table above are calculated:

Example 1: The value of the Underlier increases from an Initial Underlier Value of 100.00 to a Final Underlier Value of 130.00.

Because the Final Underlier Value is greater than the Initial Underlier Value, you will receive a payment at maturity of \$1,192.50 per \$1,000 principal amount Note that you hold, calculated as follows:

$$\$1,000 + (\$1,000 \times \text{lesser of (a) Underlier Return and (b) Maximum Upside Return})$$

$$\$1,000 + (\$1,000 \times \text{lesser of (a) 30.00% and (b) 19.25%})$$

$$\$1,000 + (\$1,000 \times 19.25\%) = \$1,192.50$$

Example 1 demonstrates that you may not participate in the full appreciation in the value of the Underlier. Even though the Underlier appreciated significantly, the payment at maturity is limited to \$1,192.50 per \$1,000 principal amount Note that you hold, which is the maximum payment on the Notes if the Underlier appreciates.

Example 2: The value of the Underlier increases from an Initial Underlier Value of 100.00 to a Final Underlier Value of 110.00.

Because the Final Underlier Value is greater than the Initial Underlier Value, you will receive a payment at maturity of \$1,100.00 per \$1,000 principal amount Note that you hold, calculated as follows:

$$\$1,000 + (\$1,000 \times \text{lesser of (a) Underlier Return and (b) Maximum Upside Return})$$

$$\$1,000 + (\$1,000 \times \text{lesser of (a) 10.00% and (b) 19.25%})$$

$$\$1,000 + (\$1,000 \times 10.00\%) = \$1,100.00$$

Example 3: The value of the Underlier decreases from an Initial Underlier Value of 100.00 to a Final Underlier Value of 95.00.

Because the Final Underlier Value is less than or equal to the Initial Underlier Value but greater than or equal to the Buffer Value, you will receive a payment at maturity of \$1,050.00 per \$1,000 principal amount Note that you hold, calculated as follows:

$$\$1,000 + (\$1,000 \times \text{Absolute Value Return})$$

Because the absolute value of the Underlier Return of -5.00% is +5.00%, the Absolute Value Return is +5.00% and the payment at maturity is calculated as follows:

$$\$1,000 + (\$1,000 \times 5.00\%) = \$1,050.00$$

Example 3 demonstrates that, if the Final Underlier Value is less than or equal to the Initial Underlier Value but greater than or equal to the Buffer Value, you will receive a positive 1% return on the Notes for each 1% decrease of the Underlier.

Example 4: The value of the Underlier decreases from an Initial Underlier Value of 100.00 to a Final Underlier Value of 50.00.

Because the Final Underlier Value is less than the Buffer Value, you will receive a payment at maturity of \$700.00 per \$1,000 principal amount Note that you hold, calculated as follows:

$$\$1,000 + [\$1,000 \times (\text{Underlier Return} + \text{Buffer Percentage})]$$

$$\$1,000 + [\$1,000 \times (-50.00\% + 20.00\%)] = \$700.00$$

Example 4 demonstrates that, if the Final Underlier Value is less than the Buffer Value, your investment in the Notes will be exposed to the decline of the Underlier in excess of the Buffer Percentage from the Initial Underlier Value.

You may lose up to 80.00% of the principal amount of your Notes. Any payment on the Notes, including the repayment of principal, is subject to the credit risk of Barclays Bank PLC.

SELECTED RISK CONSIDERATIONS

An investment in the Notes involves significant risks. Investing in the Notes is not equivalent to investing directly in the Underlier or its components. Some of the risks that apply to an investment in the Notes are summarized below, but we urge you to read the more detailed explanation of risks relating to the Notes generally in the “Risk Factors” section of the prospectus supplement. You should not purchase the Notes unless you understand and can bear the risks of investing in the Notes.

Risks Relating to the Notes Generally

- **Your Investment in the Notes May Result in a Significant Loss**—The Notes differ from ordinary debt securities in that the Issuer will not necessarily repay the full principal amount of the Notes at maturity. If the Final Underlier Value is less than the Buffer Value, your Notes will be exposed to the decline of the Underlier in excess of the Buffer Percentage from the Initial Underlier Value. *You may lose up to 80.00% of the principal amount of your Notes.*
- **Your Potential Return on the Notes If the Underlier Appreciates Is Limited to the Maximum Upside Return**—Any positive return on your Notes if the Underlier appreciates will not exceed a predetermined percentage of the principal amount, regardless of any appreciation in the value of the Underlier, which may be significant. We refer to this percentage as the Maximum Upside Return, which is equal to 19.25%. Your return on the Notes will be less than the percentage change from the Initial Underlier Value to the Final Underlier Value if such percentage is greater than the Maximum Upside Return.
- **Your Potential for a Positive Return from Depreciation of the Underlier Is Limited**—The Absolute Value Return feature applies only if the Final Underlier Value is less than the Initial Underlier Value but greater than or equal to the Buffer Value, which is equal to 80.00% of the Initial Underlier Value. Thus, any potential return on the Notes in the event that the Final Underlier Value is less than the Buffer Value is limited to 20.00%. Any decline in the Final Underlier Value from the Initial Underlier Value by more than 20.00% will result in a loss, rather than a positive return, on the Notes.
- **No Interest Payments**—As a holder of the Notes, you will not receive interest payments.
- **Any Payment on the Notes Will Be Determined Based on the Closing Values of the Underlier on the Dates Specified**—Any payment on the Notes will be determined based on the Closing Values of the Underlier on the dates specified. You will not benefit from any more favorable value of the Underlier determined at any other time.
- **Contingent Repayment of the Principal Amount Applies Only at Maturity**—You should be willing to hold your Notes to maturity. If you sell your Notes prior to such time in the secondary market, if any, you may have to sell your Notes at a price that is less than the principal amount even if at that time the value of the Underlier has increased from the Initial Underlier Value. See “—Risks Relating to the Estimated Value of the Notes and the Secondary Market—Many Economic and Market Factors Will Impact the Value of the Notes” below.
- **Owning the Notes Is Not the Same as Owning the Securities Composing the Underlier**—The return on the Notes may not reflect the return you would realize if you actually owned the securities composing the Underlier. As a holder of the Notes, you will not have voting rights or rights to receive dividends or other distributions or other rights that holders of the securities composing the Underlier would have.
- **The U.S. Federal Income Tax Consequences of an Investment in the Notes Are Uncertain**—There is no direct legal authority regarding the proper U.S. federal income tax treatment of the Notes, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the Notes are uncertain, and the IRS or a court might not agree with the treatment of the Notes as prepaid forward contracts, as described below under “Tax Considerations.” If the IRS were successful in asserting an alternative treatment for the Notes, the tax consequences of the ownership and disposition of the Notes could be materially and adversely affected.

In addition, in 2007 the Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Notes, possibly with retroactive effect. You should review carefully the sections of the accompanying prospectus supplement entitled “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders—Notes Treated as Prepaid Forward or Derivative Contracts” and, if you are a non-U.S. holder, “—Tax Consequences to Non-U.S. Holders,” and consult your tax advisor regarding the U.S. federal tax consequences of an investment in the Notes (including possible alternative treatments and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Risks Relating to the Issuer

- **Credit of Issuer**—The Notes are unsecured and unsubordinated debt obligations of the Issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the Notes, including any repayment of principal, is subject to the ability of Barclays Bank PLC to satisfy its obligations as they come due and is not guaranteed by any third party. As a result, the actual and perceived creditworthiness of Barclays Bank PLC may affect the market value of the Notes, and in the event Barclays Bank PLC were to default on its obligations, you may not receive any amounts owed to you under the terms of the Notes.
- **You May Lose Some or All of Your Investment If Any U.K. Bail-in Power Is Exercised by the Relevant U.K. Resolution Authority**—Notwithstanding and to the exclusion of any other term of the Notes or any other agreements, arrangements or

understandings between Barclays Bank PLC and any holder or beneficial owner of the Notes (or the trustee on behalf of the holders of the Notes), by acquiring the Notes, each holder or beneficial owner of the Notes acknowledges, accepts, agrees to be bound by, and consents to the exercise of, any U.K. Bail-in Power by the relevant U.K. resolution authority as set forth under “Consent to U.K. Bail-in Power” in this pricing supplement. Accordingly, any U.K. Bail-in Power may be exercised in such a manner as to result in you and other holders and beneficial owners of the Notes losing all or a part of the value of your investment in the Notes or receiving a different security from the Notes, which may be worth significantly less than the Notes and which may have significantly fewer protections than those typically afforded to debt securities. Moreover, the relevant U.K. resolution authority may exercise the U.K. Bail-in Power without providing any advance notice to, or requiring the consent of, the holders and beneficial owners of the Notes. The exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority with respect to the Notes will not be a default or an Event of Default (as each term is defined in the senior debt securities indenture) and the trustee will not be liable for any action that the trustee takes, or abstains from taking, in either case, in accordance with the exercise of the U.K. Bail-in Power by the relevant U.K. resolution authority with respect to the Notes. See “Consent to U.K. Bail-in Power” in this pricing supplement as well as “U.K. Bail-in Power,” “Risk Factors—Risks Relating to the Securities Generally—Regulatory action in the event a bank or investment firm in the Group is failing or likely to fail, including the exercise by the relevant U.K. resolution authority of a variety of statutory resolution powers, could materially adversely affect the value of any securities” and “Risk Factors—Risks Relating to the Securities Generally—Under the terms of the securities, you have agreed to be bound by the exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority” in the accompanying prospectus supplement.

Risks Relating to the Underlier

- **The Underlier Reflects the Price Return of the Securities Composing the Underlier, Not the Total Return**—The return on the Notes is based on the performance of the Underlier, which reflects changes in the market prices of the securities composing the Underlier. The Underlier is not a “total return” index that, in addition to reflecting those price returns, would also reflect dividends paid on the securities composing the Underlier. Accordingly, the return on the Notes will not include such a total return feature.
- **Adjustments to the Underlier Could Adversely Affect the Value of the Notes**—The sponsor of the Underlier may add, delete, substitute or adjust the securities composing the Underlier or make other methodological changes to the Underlier that could affect its performance. The Calculation Agent will calculate the value to be used as the Closing Value of the Underlier in the event of certain material changes in or modifications to the Underlier. In addition, the sponsor of the Underlier may also discontinue or suspend calculation or publication of the Underlier at any time. Under these circumstances, the Calculation Agent may select a successor index that the Calculation Agent determines to be comparable to the Underlier or, if no successor index is available, the Calculation Agent will determine the value to be used as the Closing Value of the Underlier. Any of these actions could adversely affect the value of the Underlier and, consequently, the value of the Notes. See “Reference Assets—Indices—Adjustments Relating to Securities with an Index as a Reference Asset” in the accompanying prospectus supplement.
- **We May Accelerate the Notes If a Change-in-Law Event Occurs**—Upon the occurrence of legal or regulatory changes that may, among other things, prohibit or otherwise materially restrict persons from holding the Notes or the Underlier or its components, or engaging in transactions in them, the Calculation Agent may determine that a change-in-law event has occurred and accelerate the Maturity Date for a payment determined by the Calculation Agent in its sole discretion. Any amount payable upon acceleration could be significantly less than any amount that would be due on the Notes if they were not accelerated. However, if the Calculation Agent elects not to accelerate the Notes, the value of, and any amount payable on, the Notes could be adversely affected, perhaps significantly, by the occurrence of those legal or regulatory changes. See “Terms of the Notes—Change-in-Law Events” in the accompanying prospectus supplement.
- **Historical Performance of the Underlier Should Not Be Taken as Any Indication of the Future Performance of the Underlier Over the Term of the Notes**—The value of the Underlier has fluctuated in the past and may, in the future, experience significant fluctuations. The historical performance of the Underlier is not an indication of the future performance of the Underlier over the term of the Notes. Therefore, the performance of the Underlier over the term of the Notes may bear no relation or resemblance to the historical performance of the Underlier.

Risks Relating to Conflicts of Interest

- **We and Our Affiliates May Engage in Various Activities or Make Determinations That Could Materially Affect the Notes in Various Ways and Create Conflicts of Interest**—We and our affiliates play a variety of roles in connection with the issuance of the Notes, as described below. In performing these roles, our and our affiliates’ economic interests are potentially adverse to your interests as an investor in the Notes.

In connection with our normal business activities and in connection with hedging our obligations under the Notes, we and our affiliates make markets in and trade various financial instruments or products for our accounts and for the account of our clients and otherwise provide investment banking and other financial services with respect to these financial instruments and products. These financial instruments and products may include securities, derivative instruments or assets that may relate to the Underlier or its components. In any such market making, trading and hedging activity, and other financial services, we or our affiliates may take positions or take actions that are inconsistent with, or adverse to, the investment objectives of the holders of the Notes. We and our affiliates have no obligation to take the needs of any buyer, seller or holder of the Notes into account in conducting these

activities. Such market making, trading and hedging activity, investment banking and other financial services may negatively impact the value of the Notes.

In addition, the role played by Barclays Capital Inc., as the agent for the Notes, could present significant conflicts of interest with the role of Barclays Bank PLC, as issuer of the Notes. For example, Barclays Capital Inc. or its representatives may derive compensation or financial benefit from the distribution of the Notes and such compensation or financial benefit may serve as an incentive to sell the Notes instead of other investments. Furthermore, we and our affiliates establish the offering price of the Notes for initial sale to the public, and the offering price is not based upon any independent verification or valuation.

In addition to the activities described above, we will also act as the Calculation Agent for the Notes. As Calculation Agent, we will determine any values of the Underlier and make any other determinations necessary to calculate any payments on the Notes. In making these determinations, we may be required to make discretionary judgments, including those described in the accompanying prospectus supplement and under “—Risks Relating to the Underlier” above. In making these discretionary judgments, our economic interests are potentially adverse to your interests as an investor in the Notes, and any of these determinations may adversely affect any payments on the Notes.

Risks Relating to the Estimated Value of the Notes and the Secondary Market

- **Lack of Liquidity**—The Notes will not be listed on any securities exchange. Barclays Capital Inc. and other affiliates of Barclays Bank PLC intend to make a secondary market for the Notes but are not required to do so, and may discontinue any such secondary market making at any time, without notice. Barclays Capital Inc. may at any time hold unsold inventory, which may inhibit the development of a secondary market for the Notes. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Notes easily. Because other dealers are not likely to make a secondary market for the Notes, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which Barclays Capital Inc. and other affiliates of Barclays Bank PLC are willing to buy the Notes. The Notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Notes to maturity.
- **Many Economic and Market Factors Will Impact the Value of the Notes**—The value of the Notes will be affected by a number of economic and market factors that interact in complex and unpredictable ways and that may either offset or magnify each other, including:
 - the values and expected volatility of the Underlier;
 - the time to maturity of the Notes;
 - dividend rates on the components of the Underlier;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events;
 - supply and demand for the Notes; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.
- **The Estimated Value of Your Notes Is Expected to Be Lower Than the Initial Issue Price of Your Notes**—The estimated value of your Notes on the Initial Valuation Date is expected to be lower, and may be significantly lower, than the initial issue price of your Notes. The difference between the initial issue price of your Notes and the estimated value of the Notes is expected as a result of certain factors, such as any sales commissions expected to be paid to Barclays Capital Inc. or another affiliate of ours, any selling concessions, discounts, commissions or fees expected to be allowed or paid to non-affiliated intermediaries, the estimated profit that we or any of our affiliates expect to earn in connection with structuring the Notes, the estimated cost which we may incur in hedging our obligations under the Notes, and estimated development and other costs which we may incur in connection with the Notes.
- **The Estimated Value of Your Notes Might Be Lower If Such Estimated Value Were Based on the Levels at Which Our Debt Securities Trade in the Secondary Market**—The estimated value of your Notes on the Initial Valuation Date is based on a number of variables, including our internal funding rates. Our internal funding rates may vary from the levels at which our benchmark debt securities trade in the secondary market. As a result of this difference, the estimated values referenced above might be lower if such estimated values were based on the levels at which our benchmark debt securities trade in the secondary market.
- **The Estimated Value of the Notes Is Based on Our Internal Pricing Models, Which May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions**—The estimated value of your Notes on the Initial Valuation Date is based on our internal pricing models, which take into account a number of variables and are based on a number of subjective assumptions, which may or may not materialize. These variables and assumptions are not evaluated or verified on an independent basis. Further, our pricing models may be different from other financial institutions’ pricing models and the methodologies used by us to estimate the value of the Notes may not be consistent with those of other financial institutions which may be purchasers or sellers of Notes in the secondary market. As a result, the secondary market price of your Notes may be materially different from the estimated value of the Notes determined by reference to our internal pricing models.
- **The Estimated Value of Your Notes Is Not a Prediction of the Prices at Which You May Sell Your Notes in the Secondary Market, If Any, and Such Secondary Market Prices, If Any, Will Likely Be Lower Than the Initial Issue Price of Your Notes and May Be Lower Than the Estimated Value of Your Notes**—The estimated value of the Notes will not be a prediction

of the prices at which Barclays Capital Inc., other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Notes in the secondary market at any time will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than our estimated value of the Notes. Further, as secondary market prices of your Notes take into account the levels at which our debt securities trade in the secondary market, and do not take into account our various costs related to the Notes such as fees, commissions, discounts, and the costs of hedging our obligations under the Notes, secondary market prices of your Notes will likely be lower than the initial issue price of your Notes. As a result, the price at which Barclays Capital Inc., other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions, if any, will likely be lower than the price you paid for your Notes, and any sale prior to the Maturity Date could result in a substantial loss to you.

- **The Temporary Price at Which We May Initially Buy the Notes in the Secondary Market and the Value We May Initially Use for Customer Account Statements, If We Provide Any Customer Account Statements at All, May Not Be Indicative of Future Prices of Your Notes**—Assuming that all relevant factors remain constant after the Initial Valuation Date, the price at which Barclays Capital Inc. may initially buy or sell the Notes in the secondary market (if Barclays Capital Inc. makes a market in the Notes, which it is not obligated to do) and the value that we may initially use for customer account statements, if we provide any customer account statements at all, may exceed our estimated value of the Notes on the Initial Valuation Date, as well as the secondary market value of the Notes, for a temporary period after the initial Issue Date of the Notes. The price at which Barclays Capital Inc. may initially buy or sell the Notes in the secondary market and the value that we may initially use for customer account statements may not be indicative of future prices of your Notes.

INFORMATION REGARDING THE UNDERLIER

The Underlier consists of stocks of 500 companies selected to provide a performance benchmark for the U.S. equity markets. For more information about the Underlier, see “Indices—The S&P U.S. Indices” in the accompanying underlying supplement.

Historical Performance of the Underlier

The graph below sets forth the historical performance of the Underlier based on the daily Closing Values from January 2, 2020 through July 15, 2025. We obtained the Closing Values shown in the graph below from Bloomberg Professional® service (“Bloomberg”). We have not independently verified the accuracy or completeness of the information obtained from Bloomberg.

Historical Performance of the S&P 500® Index

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

TAX CONSIDERATIONS

You should review carefully the sections in the accompanying prospectus supplement entitled “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders—Notes Treated as Prepaid Forward or Derivative Contracts” and, if you are a non-U.S. holder, “—Tax Consequences to Non-U.S. Holders.” The following discussion, when read in combination with those sections, constitutes the full opinion of our special tax counsel, Davis Polk & Wardwell LLP, regarding the material U.S. federal income tax consequences of owning and disposing of the Notes.

Based on current market conditions, in the opinion of our special tax counsel, it is reasonable to treat the Notes for U.S. federal income tax purposes as prepaid forward contracts with respect to the Underlier. Assuming this treatment is respected, upon a sale or exchange of the Notes (including redemption at maturity), you should recognize capital gain or loss equal to the difference between the amount realized on the sale or exchange and your tax basis in the Notes, which should equal the amount you paid to acquire the Notes. This gain or loss on your Notes should be treated as long-term capital gain or loss if you hold your Notes for more than a year, whether or not you are an initial purchaser of Notes at the original issue price. However, the IRS or a court may not respect this treatment, in which case the timing and character of any income or loss on the Notes could be materially and adversely affected. In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose a notional interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Notes, possibly with retroactive effect. You should consult your tax advisor regarding the U.S. federal income tax consequences of an investment in the Notes, including possible alternative treatments and the issues presented by this notice.

Treasury regulations under Section 871(m) generally impose a withholding tax on certain “dividend equivalents” under certain “equity linked instruments.” A recent IRS notice excludes from the scope of Section 871(m) instruments issued prior to January 1, 2027 that do not have a “delta of one” with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an “Underlying Security”). Based on our determination that the Notes do not have a “delta of one” within the meaning of the regulations, we expect that these regulations will not apply to the Notes with regard to non-U.S. holders. Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. If necessary, further information regarding the potential application of Section 871(m) will be provided in the pricing supplement for the Notes. You should consult your tax advisor regarding the potential application of Section 871(m) to the Notes.

SUPPLEMENTAL PLAN OF DISTRIBUTION

We will agree to sell to Barclays Capital Inc. (the “agent”), and the agent will agree to purchase from us, the principal amount of the Notes, and at the price, specified on the cover of this pricing supplement. The agent will commit to take and pay for all of the Notes, if any are taken.
